

# Field FAQ

The FAQ answers common field questions in plain language: internet, apps, power, privacy, content updates, and sharing.

VillageServer Initiative printable field guide. Save this PDF on a phone, laptop, USB drive, or microSD card before travel.

## Plain answer

When someone is confused, give them the next action, not a lecture. Each answer should point back to one simple step.

## Field steps

1. Listen for the real blocker - Is the problem power, Wi-Fi, file location, device type, language, or confidence?
2. Answer in one sentence - Give the shortest accurate answer first.
3. Show the next action - Point to the button, cable, Wi-Fi name, folder, or handout they need.
4. Confirm on the device - Have the person do the step while you watch.
5. Write down repeats - If several people ask the same question, update the guide or PDF.

## Key points

Does it need internet?: No. The local library should work offline. Internet or satellite is optional for updates.

Does every phone need an app?: No for basic library access. Some sharing routes use common apps such as LocalSend.

What if power fails?: Use battery, solar, or local power planning. Keep the library useful even when the live link is off.

Is this packet scraping?: No. Public analytics collect page visits, referrers, and campaign fields. They do not inspect packet payloads.

Setup Guide

Field habit: do one small test first. Open one file, confirm it works offline, then teach the next person to repeat it.
