

Ministry Resource Partners

Partners help with relationships, Scripture resources, digital libraries, nonprofit tools, field testing, and ministry credibility.

VillageServer Initiative printable field guide. Save this PDF on a phone, laptop, USB drive, or microSD card before travel.

Plain answer

VillageServer should not pretend to do everything alone. The work is stronger when trusted partners provide content, relationships, hardware support, or field feedback.

Field steps

1. Name the need - Decide whether the gap is content, hardware, field access, training, nonprofit support, or translation.
2. Match the partner - Use partners such as Project Bible Runners, Digital Bible Society, and TechSoup where they fit.
3. Request clearly - Ask for the specific resource, license permission, discount, or relationship support needed.
4. Credit properly - Keep partner names and content permissions visible and accurate.
5. Review annually - Update partner information as the initiative grows.

Key points

Project Bible Runners: Field relationships and Scripture-access context.

Digital Bible Society: Digital Bible resources and library support.

TechSoup: Discounted nonprofit technology and hardware sourcing help.

Board takeaway: Affiliates make the initiative more credible and less isolated.
