

Android to Android

Quick Share

No cloud upload required

USE THIS WHEN

Both people have Android phones and need a nearby wireless transfer.

Follow these steps

01

Prepare both phones

Turn on Bluetooth, Wi-Fi, and Location. Keep both phones unlocked and nearby.

02

Open the file

In Files by Google or your phone's file manager, select the resource to share.

03

Choose Quick Share

Tap Share, then Quick Share. Wait for the receiving Android to appear.

04

Accept the transfer

Tap the receiving device and accept the request on that phone.

05

Open it offline

Find the file in Downloads or the Quick Share folder and test it in airplane mode.

SUCCESS CHECK

- Quick Share reports that sending is complete.
- The received file opens without mobile data.

FIELD NOTE

For large folders, send one small file first. Keep the screens awake until the transfer finishes.
